DESCRIPTION

The robust VMD70 and VMD100 feature best-in-class manoeuvrability, safety and serviceability. Both models are a direct response to customer feedback on the previous range with a complete new machine layout putting the engine on the front and the huge water tank to the rear which provides a perfect 50/50 weight distribution. Both models are fully hydrostatic and offer a best-in-class kerb clearance. Both VMD70 and VMD100 are easy to use. The combination of static weight, manoeuvrability, amplitude and high frequency lifts both models to the top of the market in terms of productivity.
